MY home – MY style

Home is where I can really relax and be myself. A place where I can express my own personal style and taste, surrounding myself with the things I love. Choosing from superior wood species, dimensions and colours in the Scheucher Parkett® range of top quality wooden flooring means I can create a bespoke floor that's unique to my space, making my home a true reflection of my personality.

A specially developed range of cleaning and care products enhances the natural hues of my wooden floor. These care products protect and preserve the beautiful sheen and individual character of the wood. Gentle treatment essences ensure the surface remains smooth yet hard-wearing - free from all solvents and water-based.

Room climate

This "feel comfortable" chart for indoor room climate demonstrates the combination of relative humidity and room temperature where the overwhelming majority feels comfortable in indoor rooms.

Room temperature (vertical axis): 30°C, 28°C, 26°C, 24°C, 22°C, 20°C, 18°C, 16°C

Relative humidity (horizontal axis): 30%, 35%, 40%, 45%, 50%, 55%, 60%, 65%, 70%

Optimum range

Temporarily acceptable range

Inappropriate indoor climate for humans and wood

EN 15251:2012 „ Input parameters for indoor climate" recommends a seasonally caused relative humidity of approx. 30% - 65% for a healthy room climate. In this range, natural characteristics of wood like gaps, minor cracks or warpage of your parquet floor may occur in a moderate degree. In case of long-term deviations, health impairments or excessive changes in the appearance of your hardwood floor, like big deformations, big gaps and cracks may occur. Wood as a natural material reacts more sensitively to changes of the relative humidity than to changes of temperature. **Therefore the key to success lies in the observance of an optimum relative humidity of your indoor air!** This generally requires periodic cleaning and maintenance of your parquet floor as well as an appropriate air humidification in the heating season. We therefor recommend cold humidifiers with an integrated sterilization system. The installation of Fidbox records your climate above and under your parquet floor over many years and can be conveniently monitored by mobile app. Paying attention to these important factors will guarantee pleasure over decades with your high-quality parquet floor from Scheucher.

Initial treatment & refreshing

To keep your Scheucher Parkett® wood floor at its best, we suggest an initial care treatment after installation of the floor. This way you can make sure that the edges and joints of your floor are protected against the penetration of humidity and dirt. Especially moisture-sensitive wood species like Beech and Maple ask for this treatment. Products of our **BILA**flor® range as well as **Chevron flooring** require an initial care treatment. Use Bona Refresher for the initial treatment for Tenseo Classico, for Tenseo Matt you should use Bona Polish Matt and for Tenseo glossy Bona Polish Gloss.

1

2

3

2h

Application

1. Clean the wood floor thoroughly with Bona Cleaner.

2. Make sure the floor is free from oil, wax and other dirt and wait until it is completely dry. Shake bottle well before use.
   Bona Refresher/ Polish is a ready-to-use, waterborne care product. Apply in steps (3 -5 m²) and evenly in thin layers along the grain of the wood. In order to get a maximum effect use a wet Bona refresher coat or Polishboy.
   No polishing required. 1 litre lasts for approx. 50m². Avoid working into the drying film which may produce streaking. In case of Chevron flooring apply using a Polishboy and spread out across to direction of plait.

3. After cleaning, let the floor dry for approx. 2 hours.

GB

Care & maintenance

It is usually sufficient to clean your floor using a vacuum cleaner or a soft broom.

Light soiling can be comfortably removed with Bona Spray Mop.

Bona Spray Mop

Bona Cleaner

Application

Bona Spray Mop

…the Bona Spray Mop enables you to clean and maintain your wooden floor in a sweep. Ergonomic and simple to use, the Spray Mop is quick to assemble and refill with the specially developed Bona floor cleaner cartridge. Forget filling up a bucket and adding concentrate - just spray and clean! No polishing required.

Bona Cleaner

… is a concentrated cleaning agent. Use 50 ml (5 capfuls) of the concentrate with 10 liters of water. For particularly dirty floors you can use 100 ml of the concentrate with 10 liters of water. In case large areas have to be cleaned, Bona Cleaner can also be used for cleaning machines. Be careful and do not use too much water since this could result in damaging your parquet floor.

GB

Basic cleaning

For basic cleaning use Bona Fernox – a liquid cleaner for sealed parquets and wood floors.

Fernox removes wax and polish residues as well as heavy soiling and footmarks made with rubber heels.

1

2

3

Application

1. For basic cleaning, use 1 liter of Bona Fernox with 5 liters of water, leave for a few minutes and then wipe the floor.

2. Then wipe the floor again with plain water since residues of Bona Fernox can negatively influence further care and maintenance steps. Wait until the floor is completely dry. Make sure you only use a damp cloth since swelling may occur if too much water is used.

3. Finally apply Bona Refresher/Polish. Bona Refresher/ Polish is a ready-to-use, waterborne care product. Evenly apply in thin layers along the grain of the wood. In order to get a maximum effect use a wet Bona refresher coat or Polishboy.
No polishing required. 1 litre lasts for approx. 50m². Avoid working into the drying film which may produce streaking. In case of Chevron flooring apply using a Polishboy and spread out across to direction of plait.

Useful tips & precautionary measures

To preserve the beautiful look of your parquet floor and protect it's suface please avoid mechanical damages whereever possible.
To avoid scratches and serious damages it is recommended to place mats in the entrance area and remove sand and grit with a broom immediately. Equip your movable furniture with felt gliders and use special rolls for wooden floors on office chairs. Do not leave any wet items on your parquet floor. To assess results properly, try out care and/or cleaning procedures in an inconspicuous place before applying the product.

These care instructions are based on our experience for years and are supposed for your support.
We will not take any responsibility for misuse.
